

Doypacks - Recyclable

Recyclable Polymer with Metallic Finish

(PE/EVOHmetallic/PE)

Recyclable, versatile and eye-catching

A recyclable polymer structure with a metallic finish to make your products stand out. Heat-sealable design with top barrier protection for a range of goods.

Top-coating (gloss/matt)
Full-colour print (CMYK & white)
Gold/silver metallic barrier layer
Heat sealable layer

-  **Eco-friendly protection:** the whole doypack is classified as 4 LDPE recyclable, thanks to its all PE structure. Combined with heat sealing, this material also provides long-life freshness for a range of goods.
-  **Full customization:** mix the metallic base with full-colour designs and you get truly unique packaging for your products and brand. With up to 10 designs falling under the one MOQ, you can tailor every inch of your doypacks for your whole product range.
-  **Expert guidance:** your order will be guided through by a team of packaging experts, from design, production to delivery.
